

HOW TO MEASURE YOUR COUNTERTOPS

In order to get the most accurate estimate for your new countertops you may want to measure your existing countertops prior to meeting with a Stone Edge Countertops Sales Associate. Below are step by step instructions on how to measure your existing countertops. You can use the graph paper on the back of this page to draw your countertop configuration and record your measurements. Once completed, you can bring this sheet with you to the Stone Edge Countertops showroom to consult with a Sales Associate.

MEASURE YOUR COUNTERTOP

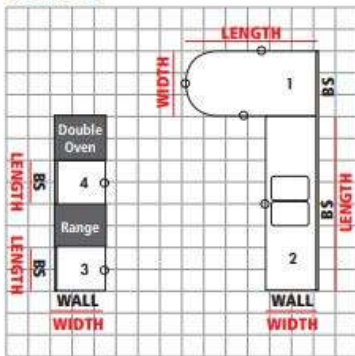

EXAMPLE

COUNTERTOP MEASUREMENTS				
	LENGTH		WIDTH	SQ. INCHES
1.	72"	X	36"	= 2,592
2.	96"	X	25.5"	= 2,448
3.	24"	X	25.5"	= 612
4.	24"	X	25.5"	= 612
Total				= 6,264

EXAMPLE

CONVERT TO SQUARE FEET	
Total Square Inches	6,264
Divide by 144	= 43.5
Total Square Feet	= 43.5

EXAMPLE

- Measure the dimension of each countertop section in inches, both the length and width, as shown in the example diagram. Be sure to round all numbers to the nearest half-inch.
- Record the measurements in the table provided on the graph paper provided as you measure each section of your countertop.
- Multiply the length times the width for each section to get the sections area in square inches.
- Total the area for each section to get the total square inches for your countertops.
- Divide the total square inch area by 144 to get the total square footage of your countertops.

DRAW YOUR COUNTERTOP

- Using the graph paper, draw the layout of your countertops. Identify where there are:
 - edges that will be finished (use a "X" to indicate a finished edge)
 - walls
 - areas where a backsplash will be used
 - cooktops
 - free standing and drop-in ranges
 - dishwashers
 - refrigerator
 - sink

BRING YOUR DIMENSIONS TO STONE EDGE COUNTERTOPS

These dimensions will help aid our Sales Associates on providing an estimate. The actual measurements for your countertop may differ from what is recorded on your graph paper. Therefore, your total cost for your countertop may differ from what may be provided as an estimated cost based on the measurements from this worksheet. If you choose to purchase countertops with Stone Edge Countertops, measurements will be taken by one of our field professionals prior to fabrication and installation of your countertops.

This estimate is non-binding and is subject to change. Your exact price will be calculated by the Sales Associate after a measurement by our field professional. Minimum quantities may apply. This estimate is provided for general information and illustration purposes only; the results are to be used only as an estimate and are not intended as resource applicable to any specific circumstances and shown not be relied upon or used as such.
